DETAILED ACTION

Information Disclosure Statement

1. The information disclosure statement (IDS) submitted on 06/16/2005 was filed after the mailing date of the PCT on 12/17/2003. The submission is in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statement is being considered by the examiner.

Specification

2. The specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claim 16 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Art Unit: 1753

5. Claim 16 recites the limitation "the image produced by the toner" in line 2 of the claim. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

7. Claims 1-16 are rejected under 35 U.S.C. 102(b) as being anticipated by US Patent 4148968, Nagashima et al.

With respect to claims 1, 5, 6, 9-12, 14, 15, and 16, Nagashima discloses a liquid toner comprising a toner and a diarylphthalide (color forming agent (A)) (column 4, lines 58-62), wherein the diarylphthalide is 3,3-bis(p-dimethylaminophenyl)-6-dimethylamino phthalide (column 7, lines 1-2), which according to the instant application is a security ingredient. The diarylphthalide (color forming agent (A)) is reacted to a reactant (color forming agent (B)) in a transferring paper (column 2, lines 36-38).

With respect to claims 2, 3, and 7, Nagashima discloses the toner composition of claim 1 as discussed above, wherein the security agent is the same as that of the instant specification (3,3-bis(p-dimethylaminophenyl)-6-dimethylamino phthalide),

Art Unit: 1753

and therefore would have the same properties as that of the instant specification, including being a colourless chromogenic, and magnetic or conductive material.

With respect to claim 4, Nagashima discloses the toner composition of claim 3 as discussed above, wherein the security agent (color forming agent (A)) is absorbed into the substrate (color forming agent (B)) (column 30, lines 51-55).

With respect to claim 8, Nagashima discloses the toner composition of claim 1 as discussed above, wherein the toner comprises color forming agent (A) (a security ingredient as discussed above) and a color forming auxiliary agent, which may be a solid plasticizer, which may include diphenyl phthalates (column 3, lines 15-26), which according to the instant specification are security ingredients.

With respect to claim 13, Nagashima discloses the toner composition of claim 12 as discussed above, wherein the color developer (color forming agent (B)) is a phenolic resin (column 2, lines 62-65).
